PROPOSED MEASURES

Public Consultation

February 2011

St. George Neighbourhood Partnership has identified a parking restriction review in the Kingsway area as a traffic scheme priority for the 2010/11 financial year.

In addition to this, we have also been asked to investigate the feasibility of installing a loading bay on Two Mile Hill in the vicinity of the shops close to the junction with Primrose Lane.

We are proposing to remove a short section of limited waiting parking in order to incorporate the loading bay, which will allow the local shops to load and unload more effectively throughout the day, a practice that is currently restricted during the morning and evening peak travel times. The centre line on Two Mile Hill will also be adjusted to allow for a three metre lane in both directions.

This stage of the consultation is aimed at providing those residents and businesses most affected with an opportunity to consider and comment on the proposals before further design work and the statutory consultation with the wider public. The proposed scheme design is shown overleaf. It would be helpful if you could indicate whether or not you support the proposals. Please let us know what you think.
