

# Time Bank Crèche

**Build up community points to spend in the centre or in a network of community centres.**

Community points could be spent on things like childcare, English Language courses or hiring spaces for parties. By signing up to the Time Bank someone could pay off these bills by helping out, volunteering or investing their time in projects at the Centre or in the community.

This idea could even be extended so that, for example, work in the centre for 1 day a week earns you 2 days of office space – which might attract entrepreneurs.

Timings & arrangements would need to be flexible but this could be a real opportunity to get the community onboard with the daily running of the Centre. People could build up their points taking part in projects that directly benefit them.

**Time donations:** In the case of Practical English language learning - **the more you work – the more you learn.**
