

Public Consultation

Hillside Road

Traffic Calming

October 2021

Funding has been allocated by local area committee to install traffic calming on Hillside Road with the aim of reducing vehicle speeds and improving safety for all.

The proposals include;

- Speed cushions along Hillside Road and Kingsway Avenue at key locations.
- A raised pedestrian crossing (or speed table) at the existing crossing point outside Air Balloon Hill Primary School. The table will provide a flush crossing point for pedestrians whilst reducing vehicle speeds.
- Pedestrian and safety improvements at two junctions on Hillside Road. These junctions are at the A431 (Air Balloon Road) and Batten Road. By tightening up the junctions, vehicle entry speeds should be reduced and pedestrians will have a shorter crossing distance. The proposals include a tree planting at the Batten Road junction.

As part of the scheme there will be changes to double yellow lining at key locations around junctions and crossings, street lighting will be reviewed and a small number of residential disabled parking spaces that are no longer in use will be removed.

If you have any comments, please contact Bristol City Council's Road Safety & Local Engineering Team by **27th October 2021** through the Bristol City Council Consultation Hub (see below).
